# DataFlex 18.1

Everything DataFlex and Mobile too!

# General Enhancements in 18.1

o Benefits for Windows, Web & Mobile

- Faster, improved Debugger
- Better handling of modal dialogs in Windows
- Faster DDOs via new runtime DD buffer class

# DataFlex Core & Connectivity

o Numerous enhancements for better utilization of SQL databases

o Cloud database support...

- SQL Azure Support – clustered indexes

# Enhancements for WebApp Development

o Studio Enhancements to make web development easier

o The Previewer will be more interactive;

- More click/drag/select capabilities
- Click to increment or decrement a panel's column count

# DataFlex 18.1 Mobile Concept

o Enable the fundamentals of DataFlex for **mobile/touch** application building

- Highly productive; framework based mobile web app development

- Single language; single environment

- Common core data management; DDs; business logic

# Project Plan

o Two Phase Alpha Test Release
- Alpha 1 - Core enhancements
  - Before end of year
- Alpha 2 – Mobile/touch framework
  - ASAP – getting it right is our priority
